

Seven simple steps to backup – join the game!

START

STEP 1

Sign a contract

STEP 2

You install an agent

To start using backup, it is enough that:

- you sign a contract;
- your servers have access to the Internet.

Web administrative console: on the server you install an agent to handle communication between the servers and the Atman Backup platform. 3 types of agents to choose from:

- File System Agent (files backup),
- Application Agent (applications/databases backup),
- Virtual Server Agent (drives/virtual machine backup)

You choose a backup plan

STEP 3

STEP 4

The system performs the tasks on a regular basis

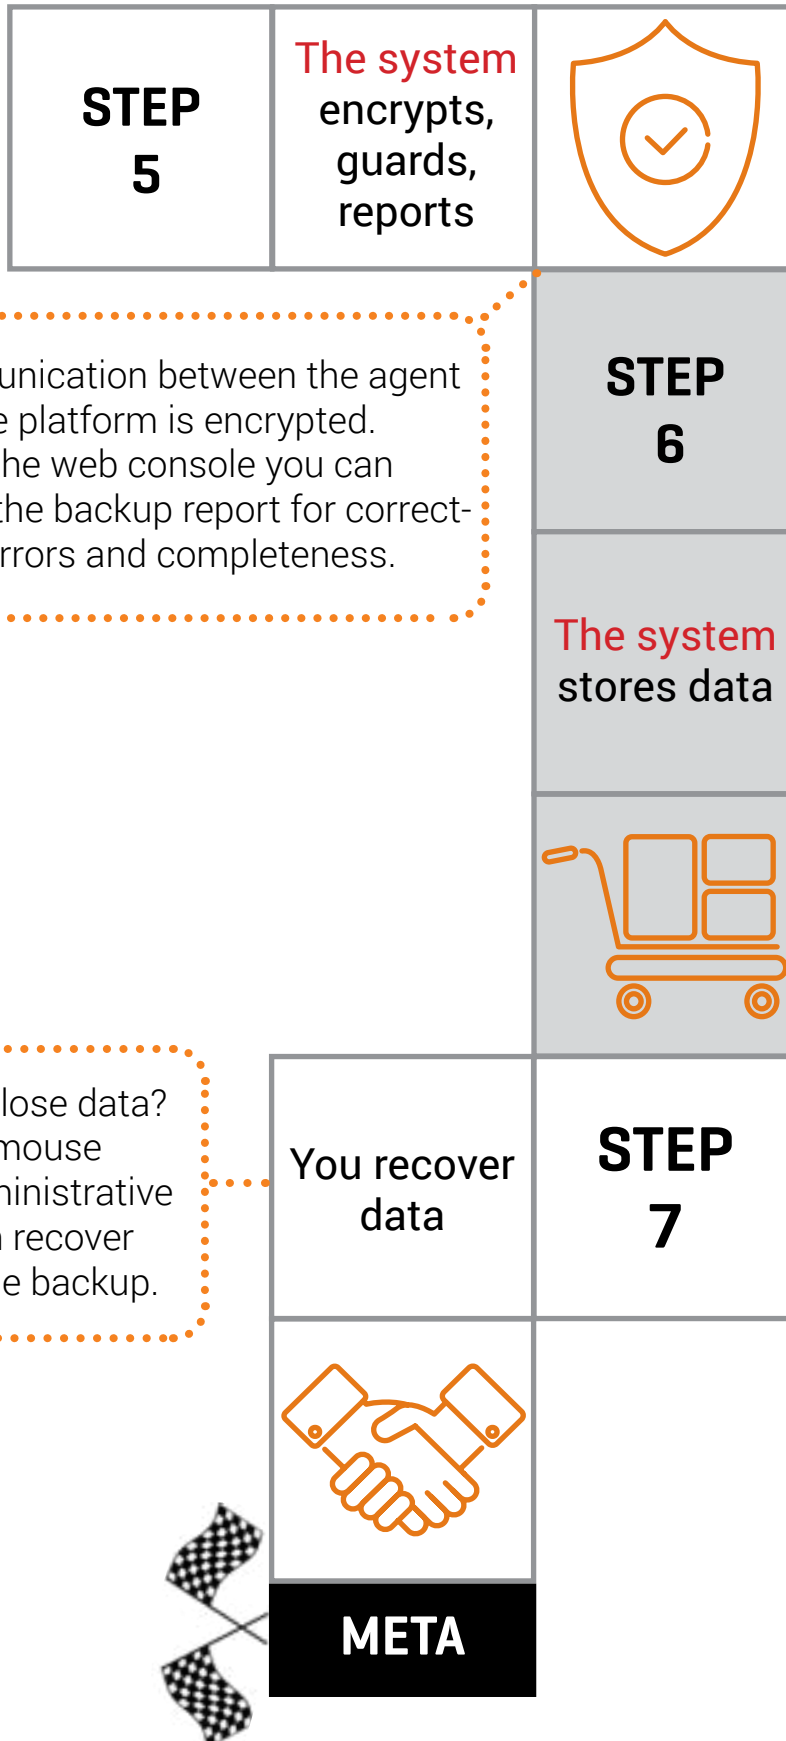

The system will regularly make the backup copies that you have configured.

In the Web console you define the server resources to be backed up and select a backup plan. Data retention for:

- 30 days (free BASIC plan)
- 60 days (free STANDARD plan)
- 90 days (paid PREMIUM plan)
- Backup daily at 8 pm, midnight or 4 am

It is also possible to create your own individual Custom (paid) plan.

The Atman Backup Platform
